REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

None of the prior art made of record discloses the invention as claimed, a scrubbing device comprising an elongate handle having: an upper and a lower end, a forward and a rearward side, and a periphery; the upper end of the handle having a substantially linear elongate slot therein, the slot having a slot opening in the periphery of the handle upper end and the slot being oriented substantially parallel to a center longitudinal axis of the handle, wherein the handle has at least one substantially linear elongate slit therein, the slit being proximate to the slot, being oriented at an angle greater than about 90 degrees with respect to the slot, having a left interior face and a right interior face, wherein the left interior face has a left ridge extending toward an interior of the slit and wherein the right interior face has a right ridge extending toward the interior of the slit, the left and right ridges being at least approximately in alignment with and opposing each other and providing a surface along with which an attaching cord may engage when it is within the slit, and having a slit opening in the periphery of the handle upper end, the slit opening being situated at one end of the slit, and a porous scrubbing material having the attaching cord affixed thereto, whereby the cord is adapted to pass through and engage the slot and to pass through and engage the at least one slit, thereby removably fastening the scrubbing material to the handle.

As stated in previous office actions, Chen (US 6,453,503) discloses many similar limitations to that of the Applicant's invention. Chen does not disclose, teach, or suggest that its slit comprises a left interior face and a right interior face, wherein the left

interior face has a left ridge extending toward an interior of the slit and wherein the right interior face has a right ridge extending toward the interior of the slit, the left and right ridges being at least approximately in alignment with and opposing each other and providing a surface along with which an attaching cord may engage when it is within the slit.

Gallacher (US 6,276,022) was also discussed thoroughly in previous office actions as teaching an elongate slit 14 (Figure 2a). A cord securing a scrubbing device to a handle is wedged or placed between the corners of 143 and 29 (pressure points). This is best shown in Figures 3b and 4 and explained in Column 2 Line 60 to Column 3 Line 7. After further consideration and discussion during the Interview with the Applicant on 26 March 2008, the Examiner finds that the singular elongate slit of Gallacher has one interior face having a first ridge (143, see Figure 4) but *the other interior face of the slit does not have a ridge extending toward an interior of the slit*. The other interior face is the flat surface of 29 facing the opposite side of the slit from which no ridge extends.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura C. Guidotti whose telephone number is (571) 272-

1272. The examiner can normally be reached on Monday-Thursday, 7:30am - 5pm, alternating Fridays.
